

Purpose of the new server EN

It's me again, Swankest CZ. Maybe I invited you to the HPL Crew group with my secondary account MrGrunt (Kyraken).

I am sorry to announce that my active work on the HPL Crew server has ended. The reason is the strange behavior of the owner of the server, my former good friend. My great wish has always been to support and develop the activities of the Amnesia and Soma community, so that this community is always alive and active.

I invited the vast majority of people to the HPL Crew server. I chose a lot of you precisely because I know that you are really interested in the Frictional Games community and games. I tried to develop the group as such and even bought a upgrade no 2 for my own money.

Sabatu has recently suffered from a strange phobia of alternative accounts, but with which there have never been any problems, and he has not been able to explain his opinion clearly to me. In addition, he made a completely incomprehensible reorganization of the whole group. It is possible that all this is related to the fact that I recently had an unpleasant exchange of views with another admin. I don't want to elaborate on anything else here, because I still consider Sabatu to be my friend and I don't want to write anything negative about him.

Trolls are becoming another problem with HPL Crew. One of them recently appeared on HPL Crew and spammed dangerous links in the channels (Steam fishing). Currently, however, anyone can invite everyone to the group, increasing the risk of further troll attacks.

All these events caused me an unpleasant feeling about the meaningfulness of my work on the HPL Crew server. It is not possible to work for a community on a server where internal conflicts are raging and where the server owner is making strange decisions.

For the above reasons, I decided to start a new group with a few friends Frictional Games - Community Center, in which I want to continue the work started on HPL Crew and make it a real center for all active members of the community. I also want to create a background for modders, fashion translators and other people. I will no longer support these activities at HPL Crew. I want to continue to actively cooperate with all members of the community, to support their activities, but all this is now being moved to a new server.

I want to pay maximum attention to the safety and comfort of the members of the new group. The group Frictional Games - Community Center will become a friendly background for all Amnesia fans.

The new server is created by a professional, so there will be many conveniences available on it, including shoes, to ensure maximum comfort for community members. Furthermore, I want to purchase Level 2 enhancements on the new server in the near future to provide even greater comfort to community members (the ability to send files up to 50 MB in size). I'm even thinking about buying a level 3 in the future (sending up to 150 MB of large files). I will unsubscribe from purchased enhancements on the old HPL Crew server, so they will no longer be available there after a period of time. Another novelty on the new server is also Spanish chat (text and voice).

New and new people will be coming to our new group, so you will have a unique opportunity to meet people who can help you in your work, with whom you will be able to share your opinions, impressions from games, important modellers and other otherwise important members will be invited here. community.

Therefore, I would like to cordially invite you to this new server.

Please do not talk to anyone about the new server yet. You're one of the first people I invited.
